 Hemdan219  Hemdan219  Kafr El-Sheikh,Egypt  Hemdan's Portfolio

Profile

Experienced JavaScript Developer with a strong track record in designing and implementing applications. Skilled in **React, Angular, Node.js**, modern frameworks, backend services, and scalable solutions. Seeking a role where I can build high-performance applications and contribute to innovative projects.

Professional Experience

Nexventures SA (Front-End Developer)  2023 Sep – present | Switzerland

- **Tapgo** (Angular Developer)

- Contributed to the **upgrades, maintenance, and improvements** of POS software for restaurants, enhancing **online ordering, QR solutions, and Kiosk systems**.
- Played a key role in **bug fixing** and **optimizing the admin portal** for better restaurant management.

Tech: Angular, Services, Guards, Routing, Interceptors, Lazy Loading, Dialog Components, Pipes.

- **Propyz Sa** (React Developer)

- Contributed to developing an **ERP system** for real estate management, improving processes for companies, tenants, owners, and admins.
- Played a key role in **system architecture** and **tech-stack decisions** to ensure scalability.
- Developed **real-time chat functionality**, a **ticketing module**, and a **real-time voting module**, enhancing communication and efficiency.

Tech: Next.js, React, REST APIs, Firebase, Git, GitHub, Full-Stack Development, React Hooks, Custom Hooks, React Hook Forms, API Integration.

Safka (MERN Stack Developer)  2024 Mar | Part Time, Remotely, Egypt

- Streamlined platform performance and fortified security to boost efficiency for **web administrators, marketers, and merchants**.
- **Security & Middleware:** Implemented **role-based access** and **permissions middleware**, eliminating critical vulnerabilities and safeguarding platform integrity.
- **Feature Development:** Engineered **financial reports, analytics, and marketer alerts**, empowering data-driven decisions. Developed robust modules for **blocked numbers, favorite products, and order filtering**, strengthening administrative control.
- **EasyOrders Integration:** Delivered seamless **webhook-based integration** for real-time syncing of campaigns and orders, automating **order processing** and tracking.
- **WhatsApp Integration:** Built a complete WhatsApp communication module enabling secure login, activity logs, order confirmation messages, bulk messaging, and media sharing directly from the system to clients' WhatsApp accounts.

Tech: React.js, Redux, REST APIs, Chakra UI, Express, NGINX, PM2, MongoDB, Node.js,

DigitalOcean. **WhatsApp Integration:** Built a complete WhatsApp communication module enabling secure login, activity logs, order confirmation messages, bulk messaging, and media sharing directly from the system to clients' WhatsApp accounts.

Freelancer (Software Engineer)  2023 Jan – present

- Delivered a wide range of projects in **web development, data science, and web scraping** for clients across various freelancing platforms.

- Managed end-to-end project execution, consistently delivering high-quality solutions that meet client needs and expectations.
- Achieved a **98% Job Success Score (JSS)** with **50+ completed jobs**, building long-term client relationships and ensuring satisfaction.

Skills: Next.js, REST APIs, Web Development, Python, Web Scraping, JavaScript, React.js, Software Development, Chrome Extensions, Supabase.

Education

ITI 3-Months intensive code camp in MEARN Stack

2023 Mar – 2023 Jul

Information Technology Institute

- Gained hands-on experience with MongoDB, Express, Angular, React, and Node.js.
- Developed proficiency in building robust and scalable web applications using the MEARN stack, with a strong focus on best practices and industry standards.

Bachelor's degree in Computer Engineering

2016 Sep – 2021 Jul

Kafr El-Sheikh university, Faculty of Engineering

- Proficient in programming languages such as C++, JavaScript, and Python, with a strong foundation in algorithms, data structures, computer networks, software engineering, and problem-solving skills

Skills

Proficient in front-end development technologies such as HTML, CSS, Bootstrap, Sass, JavaScript, jQuery, Angular and React with experience building responsive and userfriendly web applications.

Experienced in back-end technologies including Node.js, Express.js, REST API, SQL & PostgreSQL, MongoDB & Mongoose, and authentication & security.

Skilled in using TypeScript and Jasmine Unit Testing, with a strong focus on developing high-quality and scalable web applications, and Interested in Next.js, Nest.js, GraphQL, and AWS

Extensive experience in Python programming and machine learning, with a focus on developing and implementing deep learning models

Projects

Admin Panel for Hotel Management System [🔗](#)

- Developed an admin panel for **managing bookings, cabins, and guest profiles with secure login.**
- Built dynamic tables for **cabin management, booking status, and guest details.**
- Enabled staff to check in guests, process payments, and add services like breakfast.
- Created a **dashboard displaying key metrics such as sales, occupancy, and booking statistics.**
- **Implemented filters, charts, and customizable app settings (e.g., pricing, capacity).**
- Added **dark mode** for improved user experience.

Technologies: React, Supabase, Styled Components, React Query

Wild Oasis Hotel Reservation System [🔗](#)

- **Developed a full-fledged reservation system**, allowing guests to view cabin details, check availability, and make bookings.
- **Implemented secure authentication** using NextAuth, enabling profile management for faster check-ins.
- **Optimized performance** through SSR and CSR, ensuring smooth user experience.
- **Enabled flexible booking management**, allowing guests to update, cancel, and filter reservations by capacity and dates.

Technologies: Next.js, Tailwind CSS, NextAuth, SSR, CSR, Middleware, Server Actions

Mostaqi Clone Website [↗](#)

- feature-rich freelance platform facilitating client registration, project posting, freelancer applications, and contract agreements, along with payment integration (using Stripe). Implemented features such as file uploading, real-time chat, email authentication, and localization using MERN Stack.
- Additionally, created an admin dashboard with payment functionality and project management capabilities, ensuring efficient handling of user accounts and projects that violate site terms using MEAN Stack.
- **Technologies: Express, Mongoose, React, React Redux, MUI, and Angular for Dashboard.**

Social Media app [↗](#)

- Developed a social media app allowing users to register, login, publish posts, and connect with friends.
- Created a seamless user experience and optimized performance with best practices using MERN Stack.
- **Technologies: React.js, React Redux, Express, REST API and Mongoose**

E-commerce Website using React. [↗](#)

- Developed an e-commerce platform with user authentication, cart functionality, and coupon application.
- Implemented a search feature and admin dashboard for managing products and orders.
- **Technologies: React.js, React Redux, Express and Mongoose**

E-commerce Website using Angular. [↗](#)

- Developed an e-commerce platform with user authentication, cart functionality, and coupon application.
- Implemented a search feature and admin dashboard for managing products and orders.
- **Technologies: Angular, Guard Route, Angular Interceptors, Subject Behavior, and Json Server**

Courses

Full Stack JavaScript Developer Nanodegree.

Udacity

Web Development Professional Nanodegree.

Udacity

The Complete JavaScript Course: From Zero to Expert.

Udemy

The Complete Web Development Bootcamp.

Udemy

React - The Complete Guide (incl Hooks, React Router, Redux).

Udemy

Node.js, Express, MongoDB & More: The Complete Bootcamp.
